Highly reliable and professional document managers: The e-STUDIO477s/527s

Toshiba introduces two brand new A4 monochrome systems which deliver high quality document output. Designed to meet the most challenging demands of today's offices these systems offer all features required to enhance efficiency

Made for you

In today's business world you need reliable office equipment which is capable of meeting your individual needs. Flexible configuration, hassle-free integration into existing workflows and user-friendliness are essential if you want to increase your efficiency. The e-STUDIO477s/527s offer exactly that.

Elegant design packed with functionality

Both systems are network capable and offer advanced print, colour scan, copy and optional fax functionality. With a print speed of 47 and 52 pages per minute respectively, they ensure that even larger print jobs can be processed in a timely manner.

Various options enable you to configure a tailor-made system. By adding additional paper sources you can increase your paper capacity up to 3,160 sheets. Stapling can be made available via the offline stapler, which can staple up to 20 sheets, or via the inner finisher, which can not only staple up to 50 sheets automatically, but also functions as an additional output tray with a 500-sheet capacity. And to optimise your digital document workflow Toshiba offers a large range of software solutions. So whatever your needs – the e-STUDIO systems will always be a perfect fit.

Easy efficiency

To be efficient you need a system which is easy to use. The e-STUDIO477s/527s feature a 9-inch colour LCD touch panel which allows intuitive access all the functions. The possibility to store individual user templates and settings increase the usability of the systems.

Additionally, preferred settings can also be saved in the Toshiba Universal Printer Driver. This ways creating professional looking documents can be done with just a few clicks directly from the application you are using.

e-BRIDGE Re-Rite

The optional Toshiba e-BRIDGE Re-Rite software enables you to convert hard copies into editable and searchable files.

Outstanding image quality

Fine lines and tiny dots are reproduced with exceptional clarity and sharpness. Whether text or images, whether monochrome prints and copies or colour scans – the documents created with the e-STUDIO477s/527s will impress.

Flexible – now and in future

The sophisticated Toshiba e-BRIDGE controller guarantees you full flexibility. It allows the easy integration of additional software and gives you access to advanced administration of your entire Toshiba fleet. The e-BRIDGE controller is designed in such a way that when your business grows your Toshiba system can easily adapt to the new requirements.

Ultimate security

Your data is valuable and needs to be protected. The 160 GB Toshiba Secure HDD, with which the e-STUDIO477s/527s are equipped, offer state-of-the-art protection. The 256-bit AES encryption combined with the self-wiping technology make it virtually impossible for your data to fall into the wrong hands.

Environment

Environmental issues are becoming more and more important in today's world. Businesses try to reduce their impact on the environment and Toshiba helps achieve this. Duplex printing to save paper and energy save modes to reduce the power consumption are just some of the features of the e-STUDIO477s/527s to minimise the use of valuable resources. Both models fully comply with the ENERGY STAR® emission standards.

What's more, the e-STUDIO477s/527s are delivered carbon neutral via Toshiba's Carbon Zero Scheme to help you reduce the impact of your printing and copying.
